Which aspects of this course were most valuable to your overall learning experience?

- Aykut prepared excellent lectures that related the theories to real life situations. This helped for future assignments, tests, and presentation.
- I enjoyed the project because it was hands on and allowed me to learn about a topic with more depth.
- IR BASIC THEORIES
- Learning about specific instances where what we learn takes place and using examples like the ones we used for game theory.
- Lectures
- Lectures and the slides and videos associated with them.
- None
- The concepts are useful to know
- The lectures were very interesting for the most part, and I was shown many different view points about different topics
- The most valuable aspect of this course to my overall learning experience was the lectures. They were clear and informative.
- The presentations really allowed us to learn more in depth about the topic and I believe the exams were fair and really tested our knowledge without trying to trick us.
- The professor was always welcoming and willing to help me inside and outside the class, which was very nice and useful to learn and get clarifications much better.
- The professor was very enthusiastic about the subject matter and created great discussion amongst the class. Even though he is not a very experienced professor year-wise, he is one of the best professors I've had in my time at SU (and I'm a senior).
- The text book readings / power points

Which aspects of this course would you suggest changing?

- Don't have a final test and an essay due after.
- Engage students through in-class activity, provide setting for more open discussion.
- For the tests, it was hard to study considering there was a lot of content. The tests were completely fair, but narrowing down the study material was still a bit difficult.
- I think it should be more about how the concepts tie into real world examples.
- I think there should have been more study guides, to help the classmates in the class
- I thought it was a fairly taught and intriguing class.
- I thought the class was quite slow which made it quite boring
- It has a very similar daily structure (lots of lecturing) so I would change the way that information is sometimes presented
- More interaction
- More take home assignments that help clarify the lecture.
- N/A
- None
- NOTHING
- The class would be benefitted if it was a little more interactive.
- The student presentations we're not very helpful since they were not interesting enough for me to pay attention to.

This TA did a great job helping us review for the exams. Every Friday before a test was spent doing a really in-depth review.

Please list the aspects of this section and of the TA you *disliked* most:

I thought the TA did a great job, and nothing negative sticks out in my mind.

Please list suggestions for how the TA could improve his/her sections and teaching:

I don't have any other suggestions. The TA covered everything pertinent to the class in sections.

I enjoyed how Aykut was passionate about the learning material, engaged discussion, and had very good slides to simplify the information.

Please list the aspects of this section and of the TA you disliked most:

This section was slow at times; sometimes Aykut would put down a comment or input at discussion. Grading was ludicrous for a 100-level on exams, we aren't masters' yet!

Please list suggestions for how the TA could improve his/her sections and teaching:

NA, calm, composed, and engaged w/ class
